

Contents

1 The Brownian Motion	5
1.1 Continuous time processes, martingale and filtration	5
1.2 Gaussian processes and Brownian motion	6
1.3 Variation of the Brownian motion	9
2 The stochastic integral	11
2.1 Idea of the construction	11
2.2 Properties of the SI	11
3 Itô's formula	13
3.1 The formula	13
3.2 Extension of the SI	13
3.3 Examples	13
4 Stochastic differential equations	15
4.1 Definition	15
4.2 Itô Cauchy Lipschitz theorem	15
4.3 Link with PDEs	15
5 Control of diffusion processes	17
5.1 The control problem	17
5.2 Well posedness and regularity of the value function	17
6 Verification approach	19
6.1 Verification Theorem	19
6.2 An example	19

7	Dynamic programming	21
7.1	Dynamic programming principle	21
7.2	HJB equation	21
8	Discrete-time approximation	23
